- **Oracle SQL** - Commands, Functions, Clauses, Joins, SetOperators, Subquery, Constraints, Index

PROJECTS

Employee Management System Using SQL ☑

Jul 2024

Designed and developed an Employee Management System using SQL query language, leveraging basic queries, joins, subqueries, set operators, and functions to manage employee data.

Voting System Using Python ☑

Oct 2024

Developed a Python-based voting system with user input validation, error handling, and voting logic using control flow structures. Implemented try-except blocks to manage invalid inputs and ensure smooth operation.

CrudApp with API Fetch Using React-Js ☑

Dec 2024

This ReactJS app handles CRUD operations with pop-up modals and API integration, offering a dynamic and interactive user experience.

E-Commerce Website Using React-Js ☑

Dec 2024

Designed a modern, responsive e-commerce platform with React, including product listings, a shopping cart, and payment integration to provide an engaging user experience.

EDUCATION
